

How to retrieve video in the CameraMatics Safe Manager mobile application:

1. On the left menu, select Retrieve Video:

2. Select the vehicle and date of the footage you are looking for. Please note that the vehicle must be online to download footage.

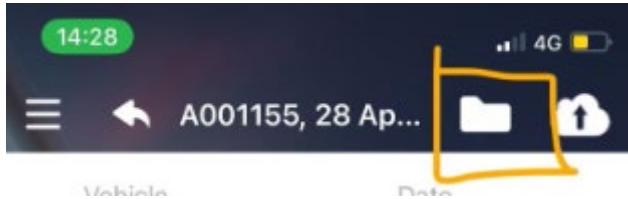

3. Select the cameras, the start time and the duration of the video(s) you would like to download and submit.

The screenshot shows the mobile app interface for selecting video parameters. At the top, the status bar shows the time 14:25, 4G signal, and battery level. Below the status bar, the app title is "A001155, 02 Ma...". The interface includes a "Vehicle" field with "A001155" and a "Date" field with "02 May 2024". There are four camera selection options: "forward", "driver", "right", and "load". The "driver" option is selected, indicated by a checked checkbox and a yellow box around it. Below the camera selection is a horizontal bar chart showing the duration of video for each camera. The x-axis is labeled "Hours" and ranges from 0 to 24. The y-axis lists the camera views: "rear", "load", "right", "driver", and "forward". Each camera view has a blue bar extending from 0 to 10 hours. Below the bar chart are two input fields: "Start Time" with "00:00:00" and "Duration" with "00:20". Both fields have yellow checkmarks next to them. Below the input fields is a note "5 minutes maximum". At the bottom, there are two buttons: "REFRESH" and "SUBMIT". The "SUBMIT" button is highlighted with a yellow box.

4. When the download is completed it will be available under the My Videos page. To access it, please click on the icon of a file; this icon will be available on the top right of the Retrieve Video page.

5. When the download is completed, you can play or download it to your smartphone.
